REQUEST FOR FILING INFORMATION CORRECTION

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

Enclosed is a copy of the Filing Receipt and of the Notice of Allowance. It was not noticed upon receipt of the Official Filing Receipt back in April 2000, that the title of the application had been picked up with a typo. Also enclosed are copies of the patent application transmittal and title page showing that the title had been given correctly. Please change the 4th from the last word as follows:

NOTIFICTION should read NOTIFIC**A**TION

It is respectfully requested that this error be corrected before the issuance of the patent.

It is believed no fee is due for this response, however, should the examiner disagree, the Commissioner is hereby authorized to charge any fees that may be required or credit any overpayment, to Deposit Account No. 19-2179, during the entire pendency period of this application.

Receipt is acknowledged of this nonprovisional Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. **If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Customer Service Center. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the PTO processes the reply to the Notice, the PTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).**

BACKGROUND OF THE INVENTION

FIELD OF THE INVENTION

15

The present invention relates to communications systems and, in particular, to a communication system employing a private branch exchange (PBX) and a TAPI interface.

DESCRIPTION OF THE RELATED ART

20

The Telephony Application Programming Interface (TAPI) is a high level programming interface for Windows™ which supports many types of telephony applications associated with conventional analog public telephone lines, PBX phone lines, ISDN phone lines, and the like. Thus, TAPI allows a communication application to support numerous telephony operations through a variety of mediums by making a function call to TAPI which will drive the hardware (fax/modem card, DSP card, network switch, and the like) coupled thereto.

25

The TAPI architecture 100 is illustrated in FIG. 1. As shown, the TAPI architecture 100 includes a TAPI implementation 104 interfaced to telephony application programs 102. TAPI 104 provides a connection to a TAPI service provider, such as a TAPI server 106, which then interfaces to hardware such as voices cards 108a, H.323 interfaces 108b, or PBX's 108c.

30

The TAPI specification requires that device configuration information
